Building 40 Hours

- Building 40 is a level 2 secure building. Building public hours are between **6:00 a.m. and 6:00 p.m.** All public access points are unlocked during these times. Any secured access points require a single credential during public operating hours.
- Secured access points are identified by the proximity keypad/card readers used to unlock them. Secured access points can be unlocked by using one of your two credentials: by entering private PIN on the proximity keypad or by placing your government ID near the proximity keypad reader. Outside building public hours, all entrances are locked and require dual credentials for access. At any proximity card/keypad reader, enter both your private PIN and place your government ID near the reader. *If you are having issues with your access, please stop by the GSA Security Office in Building 41, Suite 110, during their office hours: Monday - Friday 7:30 - 11:30 a.m. and 12 - 4 p.m.*
- The Building 40 map shows building amenities including restrooms, break areas, conference room and lactation room. Take a few minutes to do a walking tour of BLM space in Building 40.
- Visit the first floor of Building 41 across the street to the north to find the Einstein's Bros. Bagel shop, ATM, and vending machines.
- Visit www.gsa.gov/r8dfc for a full list of DFC Amenities.

Parking

- Use the Parking Map to become familiar with the most convenient open parking options near your work space.
- Please remember to park appropriately. Signs in parking areas reflect the utilization of spaces. Open parking spaces are those not marked for other uses (such as handicap, visitor, or assigned).
- Handicap parking is just north of the B40 and also south of the main entrance and in various spots around the building. Short-term parking is for our visitors and open spaces are for tenants. Thank you for honoring the needs of our customers and vendors.
