14.2 Unregulated Services.

Pursuant to this Areawide Contract, the Contractor may provide energy related services that are not subject to rate and tariff regulations by the Commission under a pre-approved alternative (FAR 52.241-8) that demonstrates the Contractor will provide these services under terms and conditions that are competitive and otherwise in the best interests of the Ordering Agency. If, as demonstrated by the Ordering Agency, the conditions for use of this pre-approved alternative cannot be satisfied, then the Ordering Agency should consider the requirement of the Competition in Contracting Act of 1984 and the extent to which a competitive acquisition process is required to select and award a contract for these unregulated services. If an Authorization under this Areawide Contract is utilized, the prices and terms and conditions for unregulated services offered by the Contractor shall be negotiated subject to the requirements of FAR 41.5, subject to the general requirements of FAR 52.241-8.

14.3 Repeal of Clauses During Term of Areawide Contract.

If, during the Term of this Areawide Contract, any of the clauses contained in this Article are repealed, revoked, or dissolved by the Government, then such clauses shall no longer be part of this Areawide Contract as of the date of such repeal, revocation, or dissolution. The elimination of these clauses by reason of such repeal, revocation, or dissolution shall not affect the continuing validity and effectiveness of the remainder of this Areawide Contract or other clauses referenced in this Article. The parties' conduct thereafter shall be modified accordingly and reflect the repeal, revocation, or dissolution as related to their respective rights and obligations hereunder.

14.4 Clauses Incorporated in Full Text.

52.241-3 Scope and Duration of Contract.

As prescribed in 41.501(c)(2), insert a clause substantially the same as the following:

Scope and Duration of Contract (Feb 1995)

(a) For the period of 10 Years the Contractor agrees to furnish and the Government agrees to purchase available utility services in accordance with the applicable tariff(s), rules, and regulations as approved by the applicable governing regulatory body and as set forth in the contract.

(b) It is expressly understood that neither the Contractor nor the Government is under any obligation to continue any service under the terms and conditions of this contract beyond the expiration date.

(End of clause)

52.241-7 Change in Rates or Terms and Conditions of Service for Regulated Services (FEB 1995)

(a) This clause applies to the extent services furnished under this contract are subject to regulation by a regulatory body. The Contractor agrees to give GSA and each Areawide Contract customer with annual billings that exceed \$250,000 consistent with FAR 41.501(d)(1) written notice of (1) the filing of an application for change in rates or terms and conditions of service concurrently with the filing of the application and (2) any changes pending with the regulatory body as of the date of contract award. Such notice shall fully describe the proposed change. If, during the term of this contract, the regulatory body having jurisdiction approves any changes, the Contractor shall forward to the Contracting Officer a copy of such changes within 15 days after the effective date thereof. The Contractor agrees to continue furnishing service under this contract in accordance with the amended tariff, and the Government agrees to pay for such service at the higher or lower rates as of the date when such rates are made effective.

(b) The Contractor agrees that throughout the life of this contract the applicable published and unpublished rate schedule(s) shall not be in excess of the lowest cost published and unpublished rate schedule(s) available to any other customers of the same class under similar conditions of use and service.

- (c) In the event that the regulatory body promulgates any regulation concerning matters other than rates which affects this contract, the Contractor shall immediately provide a copy to the Contracting Officer. The Government shall not be bound to accept any new regulation inconsistent with Federal laws or regulations.
- (d) Any changes to rates or terms and conditions of service shall be made a part of this contract by the issuance of a contract modification unless otherwise specified in the contract. The effective date of the change shall be the effective date by the regulatory body. Any factors not governed by the regulatory body will have an effective date as agreed to by the parties.

(End of clause)

14.5 State Taxes.

The contract price excludes all state and local taxes levied on or measured by the Areawide Contract or sales price of the Services or completed supplies furnished under this Areawide Contract. ARTICLE 17. REPORTING

17.1. [RESERVED]

ARTICLE 18. UTILITY ENERGY SERVICE CONTRACTS

18.1. Utility Energy Service Contracts (UESC): Federal agencies are authorized under [42 U.S.C. § 8256 \(c\)\(1\)](#) to enter into UESCs. A UESC is a limited-source acquisition between a federal agency and an eligible serving utility ("Contractor") for energy management services that generate savings from the implementation of energy and water conservation measures (collectively referred to as ECMs). The Department of Defense's authority to enter into UESC contracts under either [10 USC §2913](#) (for gas and electric utilities) or [10 USC §2866](#) (for water utilities).

18.2. UESC Eligibility and Contractor's Responsibilities under this Areawide Contract:

- (a) The Contractor is not eligible to provide UESCs to federal facilities under this Areawide Contract unless the facility is located within a geographic area that the Contractor is authorized to provide services.
- (b) The work that is to be performed under the Authorization for a UESC shall be limited to work resulting in a direct reduction in energy or water usage or cost (see Article 1.1) and any modifications or repairs (including energy consuming devices and required support structures) that are necessary as a direct result of the installation of the ECM.
- (c) Unless otherwise provided by law, the total savings generated by the ECMs over the term of the contract must equal or exceed the total task order value.

18.3. Statutory Requirements for Implemented Measures: Under [42 U.S.C. § 8253 \(f\)\(5\)](#) federal agencies are required to follow-up on any implemented ECMs as follows:

- (A) equipment, including building and equipment controls, is fully commissioned at acceptance to be operating at design specifications;*
- (B) a plan for appropriate operations, maintenance, and repair of the equipment is in place at acceptance and is followed;*
- (C) equipment and system performance is measured during its entire life to ensure proper operations, maintenance, and repair; and*
- (D) energy and water savings are measured and verified.*

18.4. Annual Scoring of UESCs: UESC's that meet the definition of "Energy Management Service" ("EMS") prescribed in Article 1.1 of this Areawide Contract, and which follow the guidance prescribed in OMB Memoranda M-12-21 and M-98-13, may be scored for budgetary purposes by the Ordering Agency(ies) on an annual basis if the UESC requires:

- (1) energy savings performance assurances or guarantees of the savings to be generated by improvements, which must cover the full cost of the Federal investment for the improvements;
- (2) measurement and verification (M& V) of savings through commissioning and retro commissioning; and
- (3) competition or an alternatives analysis as part of the selection process prior to entering into a UESC.

18.5. Performance Assurance and Savings Guarantees: In accordance with [OMB Memorandum 12-21](#), a UESC must include performance assurances, or a savings guarantee, or both. All performance assurance activities are established in a Performance Assurance Plan which is a detailed set of project specific, actionable protocols that define important tasks and responsibilities throughout the contract term. They are developed to reflect the site conditions, agency capabilities, operations and maintenance requirements and complexities of the planned ECMs.

The Ordering Agency and Contractor may include savings guarantees for one or all ECMs under a task order for a part of, or the entire performance period. More details can be found in the Federal Energy Management Program's (FEMP) [Performance Assurance Planning](#) webpage.

18.6. Commissioning: As required under [42 U.S.C. § 8253](#), all implemented ECMs shall be fully commissioned at acceptance to be operating at design specifications. More details can be found at FEMP's [Commissioning in Federal Buildings](#) resource webpage.

18.7. Measurement and Verification: As required under [42 U.S.C. § 8253](#), for all implemented ECMs, the Ordering Agency shall ensure that energy and water savings are measured and verified. More details can be found at FEMP's [Measurement and Verification for Federal Energy Saving Performance Contracts](#) resource webpage.

18.8. Subcontracting: The Contractor shall have the right to enter into a subcontract with a third-party Energy Service Company ("ESCO"), which shall include unregulated affiliates of the Contractor, to perform the project development and project management functions under the EMS Authorization. The Contractor or any such ESCO designated by Contractor may perform any or all of the ECMs requested by an Ordering Agency through subcontractors, (each an "ECM Subcontractor"). ECM Subcontractors shall be competitively selected in accordance with FAR 52.244-5 (ECM Subcontractor selection shall be based on cost, experience, past performance and other factors as Contractor and the Ordering Agency may mutually deem appropriate and reasonably related to the Government's minimum requirements. Upon request by the Ordering Agency, the Contractor shall make available to the Contracting Officer all documents related to the selection of an ECM Subcontractor. In no event shall the service be provided by an ECM Subcontractors listed as excluded from Federal Procurement Programs maintained by GSA pursuant to FAR 9.404.

18.9. Warranties: For all EMS Authorizations, it is desirable to have a warranty clause that addresses the specific needs and requirements of the work being performed and equipment that is to be provided by the Contractor. The task order should document how the warranties relate to the maintenance and repair requirements. In addition, in the absence of a warranty clause in the Authorization, the following language will serve as the default clause:

The Contractor shall pass through to the Ordering Agency all warranties on equipment installed or provided by it or its subcontractors on Government property with the following representation:

Contractor acknowledges that the United States of America will own or lease the equipment and/or materials being installed or supplied hereunder, and, accordingly, agrees that all warranties set forth herein, or otherwise provided by law in favor of the company shall inure also to the benefit of the United States and that all claims arising from any breach of such warranties or as a result of defects in or repairs to such equipment or supplies may be asserted against contractor or manufacturer directly by the United States of America, to the extent that such warranty is assignable.

18.10. Reporting Requirements: Agencies must provide a copy of each award and executed authorization issued under an areawide contract to GSA at utilities@gsa.gov within 30 days after execution. The contractor upon request by Agencies will provide, at a minimum, the fully executed task order to include project capital investment amount and total contract value (including financing), scope to include an ECM list, total contract length from task order award through performance period, and energy saved or generated (kWh or MMBTU), water saved (kgal) and total cost savings (\$). All reporting shall be sent to the email or mailing address provided in Article 16.1.

The Contractor shall provide task order financial schedules to the agency during the project development process. eProject Builder* (ePB, found at <https://eprojectbuilder.lbl.gov>) is strongly recommended, or at the agency contracting officer's discretion alternative task order financial schedules may be required, which should be consistent with all of the data points contained in the ePB schedules. At the discretion of the contracting officer, the Contractor may use the ePB on-line, web-based ePB system to deliver project financial schedules.

Note: eProject Builder is comprised of two different components: a downloadable Microsoft Excel spreadsheet that generates task order financial schedules and a secure on-line, *web-based* system that *preserves, tracks and reports information for agency energy projects*. It is strongly recommended to use the ePB on-line system. The ePB online system does not need to be used if it conflicts with agency policy; instead, a downloadable Microsoft Excel spreadsheet can be used. A non-calculating ePB spreadsheet template is available if the agency or contractor is unable to use the calculating ePB spreadsheet template.

ARTICLE 19. MISCELLANEOUS

19.1. Contract Administration: The Ordering Agency shall assist in the day-to-day administration of the Service being provided to it under an Authorization.

19.2. Anti-Deficiency: Unless otherwise authorized by Public Law or Federal Regulation, nothing contained herein shall be construed as binding the Government to expend, in any one fiscal year, any sum in excess of the appropriation made by Congress for that fiscal year in furtherance of the matter of any Authorization executed in accordance with this Areawide Contract or to involve the Government in an obligation for the future expenditure of monies before an appropriation is made (Anti-Deficiency Act, 31 U.S.C. 1341.A.1).

19.3. Obligation to Serve: Nothing contained in this Areawide Contract shall obligate the Contractor to take any action which it may consider to be detrimental to its obligations as a public utility.

19.4. Term of Authorizations: It is recognized that during the Term of this Areawide Contract, situations and/or requirements may arise where it may be desirable that the term of service to an Ordering Agency's facility extend beyond the Term of this Areawide Contract. In such event, the particular Authorization involved may specify a term extending beyond the Term of this Areawide Contract, provided that it is within the contracting authority of the Ordering Agency and appropriate termination liability provisions have been negotiated between the Contractor and Ordering Agency to address unamortized balances for connection charges and/or financing charges associated with EMS projects.

19.5. Indemnification: Any indemnification language contained in standard form agreements executed between the Ordering Agency and the Contractor shall be binding upon the Federal Government only to the extent authorized by law, opinions of the Government Accountability Office and the Federal Torts Claims Act.

19.6. Authorization Procedure: The execution of an Authorization by Contractor and an Ordering Agency shall not supersede a previously executed Authorization addressing the same service unless specifically stated. Allowable terms of Authorizations shall be consistent with the guidance and policy set forth in Article 2.2 of this Areawide contract.

19.7. Construction Wage Rate Requirements: Since this Areawide Contract does not involve the regulated utility company performing on a Federally funded or assisted contract for the construction, alteration, or repair of a public work and/or public facility, the Construction Wage Rate Requirements (previously known as the Davis Bacon Act) do

not apply to the work to be performed by the regulated utility company in connection with the provision of regulated utility services. However, if a determination by the Department of Labor (DOL) differs, the regulated utility company will be solely responsible for any financial liability for any contrary determination by DOL.
