

## GSA Fleet Telematics Fact Sheet

**The GSA Fleet Telematics Program is the only fully integrated, FedRAMP Authorized, shared service telematics solution in government.** From monitoring vehicle performance to automating mileage reporting, GSA's telematics solution empowers fleet managers to make informed decisions and achieve operational efficiencies. Other data captured can help meet Asset Level Data (ALD) reporting requirements in FAST. Features include:

- \* Advanced Reporting
- \* Active Vehicle Tracking
- \* Route Optimization
- \* Collision Reconstruction
- \* Driver Behavior Management
- \* Robust Engine Data Reporting
- \* Engine Health & Maintenance
- \* Theft & Lost Asset Recovery
- \* Open Data (API) Integration
- \* Custom Mapping & Geofencing
- \* Ancillary Service Expandability
- \* Zero Emission Vehicle Planning

### Service:

Subscription service includes access to the MyGeotab fleet management web tool and the Geotab Drive mobile app. MyGeotab summarizes and displays all telematics data, supports multiple logins and permission levels, and enables customizable and automated reporting. Dedicated online training and support for your agency is also included. Examples of data collected:

- \* Engine measurement and vehicle fault data
- \* Configurable GPS system
- \* Total engine hours
- \* Miles traveled
- \* Number of days used
- \* Number of trips
- \* Device tampering detection
- \* Full accident reconstruction capabilities
- \* Vehicle maintenance reminder
- \* Driver ID (hardware add-on)
- \* Driver coaching
- \* Dashboard and custom reports
