

Pre-conference Event Federal Fleet Boot Camp

1:00pm **Welcome**
Patrick McConnell and Marcerto
Simms
GSA, Office of Government-wide Policy
Krystal J. Brumfield, J.D., LL.M.
Chief Acquisition Officer
Associate Administrator
GSA, Office of Government-wide Policy (OGP)

1:15pm **GSA Fleet Overview**
Miguel Welanetz, GSA Fleet
Tom Moriarty, GSA Fleet

2:00pm **Federal Fleet Policy Overview**
Patrick McConnell, GSA OGP
Marcerto Simms, GSA OGP

2:30pm **Federal Fleets & EISA 141- EPA Guidance**
Kristin Kenausis, EPA

3:00pm **Break (15 minutes)**

3:15pm **Fleet Sustainability Requirements & Actions**
Jesse Bennett, NREL
Julian Bentley, Bentley Energy

4:00pm **Asset Level Data Reporting & Dashboards**
Ron Stewart, INL
Chouaib Touraq, GSA OGP

4:45pm **Federal Fleet Resources & Questions**
Patrick McConnell, GSA OGP
Adlore Chaudier, Tech Systems,
Inc.

5:00pm **Thank you for attending!**

If you have additional questions, please email vehicle.policy@gsa.gov.
Sessions and times are subject to change without notice.*

Krystal J. Brumfield, J.D., LL.M.
Chief Acquisition Officer
Associate Administrator
GSA, Office of Government-wide Policy

Profile: Federal Motor Vehicle Fleets (non-tactical)

Total Inventory: 656,494

20 Large Fleets (> 2,000 veh)

Miles Traveled: 4.30 billion

Operating Costs: \$5.04 billion

Fleet Composition by Vehicle Type

Trucks:
65.4%

Sedans:
33.3%

Buses/Ambulances: 1.5%

ZEV Inventory: 2,705 (does not include low-speed vehicles)

Domestic Fleet:

94.1%

Foreign Fleet:

5.9%

Fleet Composition by Agency Type

USPS: 36.7%

Civilian: 36.6%

Military: 26.7%

Fleet Composition by Vehicle Source

Agency-owned: 68.8%

GSA Fleet: 30.6%

Commercial Lease: .64%

Learning Objectives

- **Understand what fleet management is and how it supports federal agency missions.**
- **Learn about the complexities of being a fleet manager.**
- **Identify stakeholders and key components of federal fleet management.**
- **Know where to find additional resources and information for managing a federal fleet.**

GSA Fleet Overview

Miguel Welanetz, GSA Fleet
Tom Moriarty, GSA Fleet

GSA Fleet

Your one-stop shop for all fleet management solutions

Purchasing

Leasing

Short Term
Rental

The **right vehicle** at the **right price** with **great customer service** and the data required to effectively and efficiently manage your fleet.

Vehicle Purchasing

- Mandatory source for all non-tactical vehicles
 - [AutoChoice](#) - online ordering tool (soon to be replaced by GSAFleet.gov).
 - Professional engineering services including technical assistance and vehicle design services.
 - Professional contracting teams and customer staff.
- Leverage buying power of Federal Government and achieve outstanding discounts below dealer invoice
 - FY22 7.2%, FY23 2.6%, FY24 4.8%.
 - Savings up to **\$100M** per year.

Vehicle Offerings

- GSA strives to offer a wide variety of vehicles to meet your mission
 - EVs, Low GHG, E85
 - Law enforcement upfits
 - Custom engineered solutions
- GSA Fleet ensures compliance with Buy American Act, Trade Agreements Act, and applicable EOs.
- Open season will bring more options to GSA Fleet.
- Focus on your mission!

State of the Market

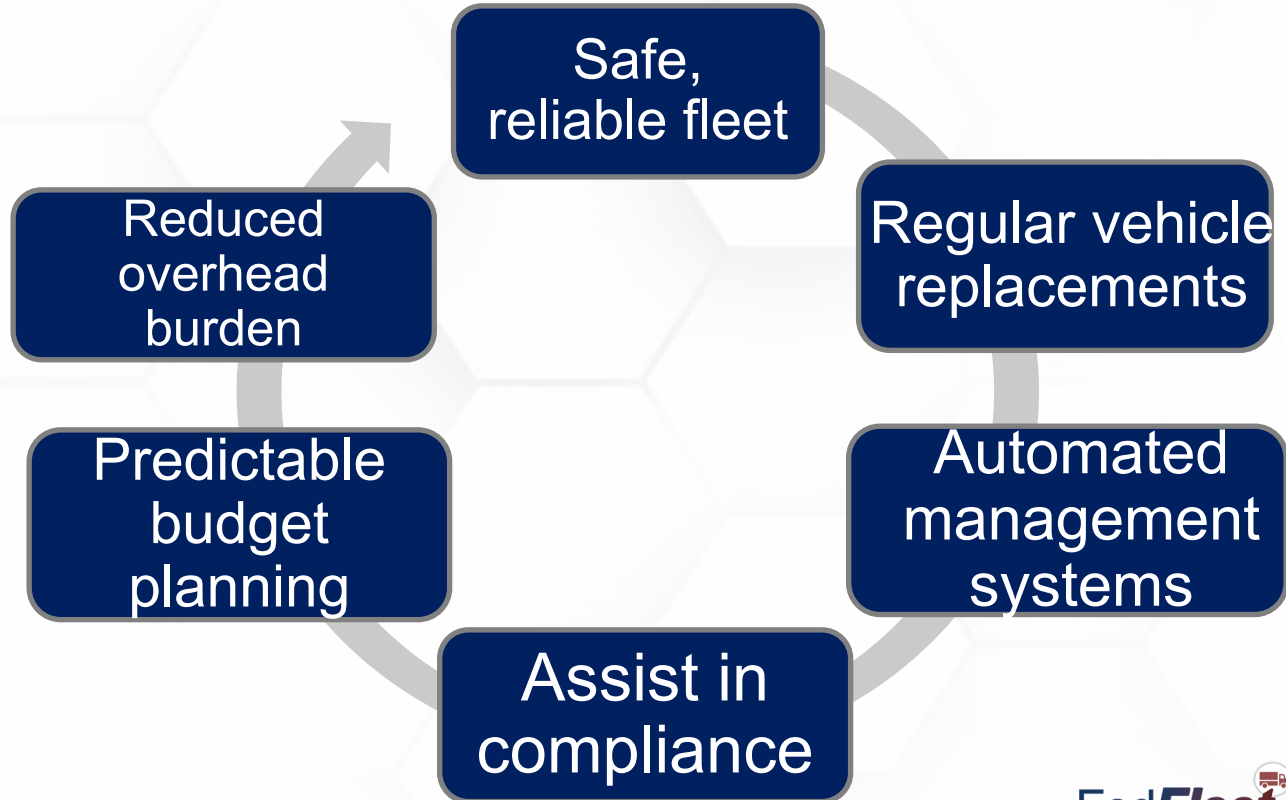

- Supply Chain Disruptions
 - Though improving, will persist for months to come.
- Mass production ramp up for all vehicle classes is just beginning for EVs.

Availability

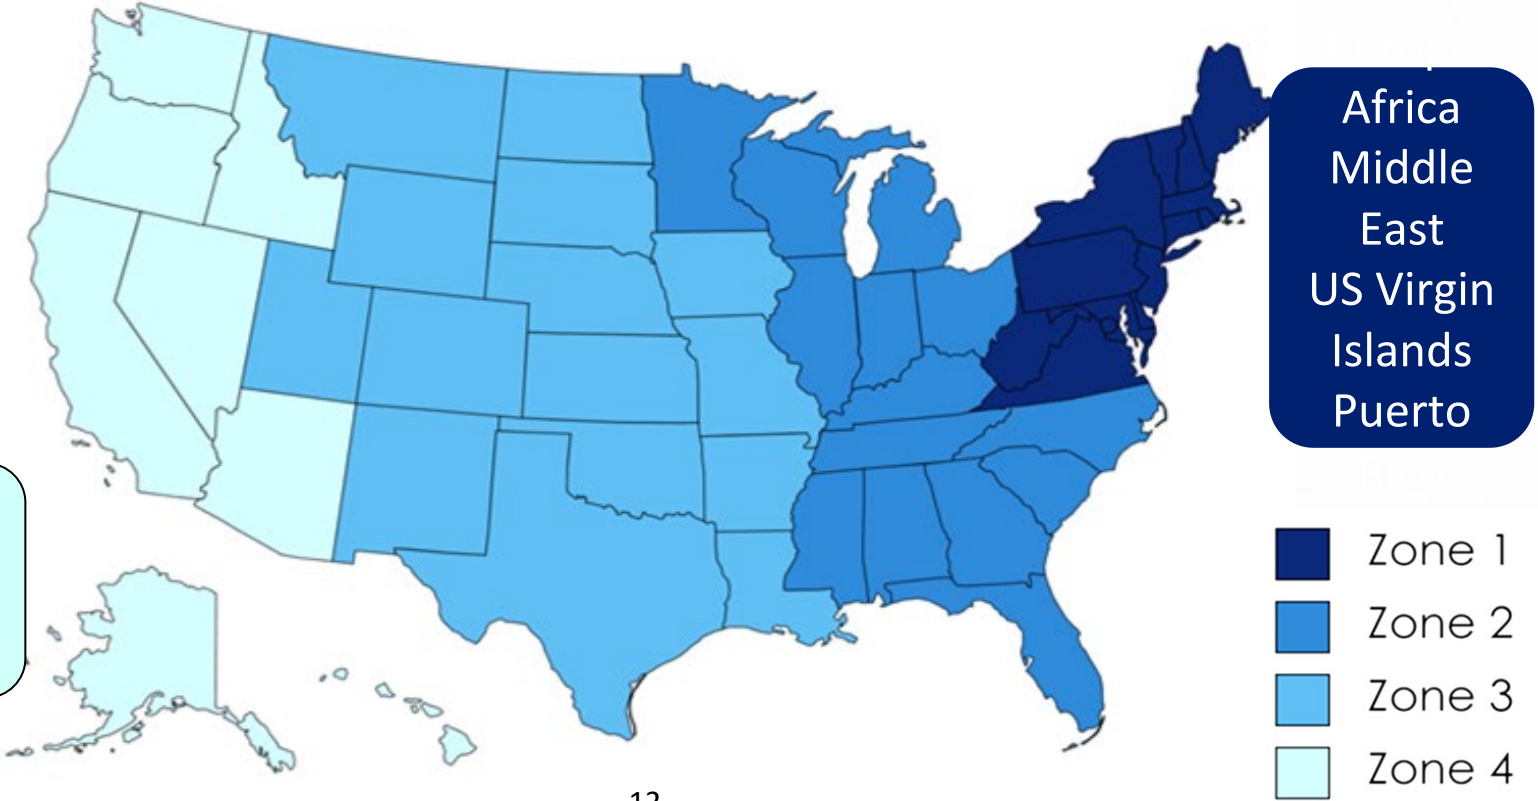

Pricing

Lead Time

Vehicle Leasing

Where is GSA Fleet?

Fleet Service Representative

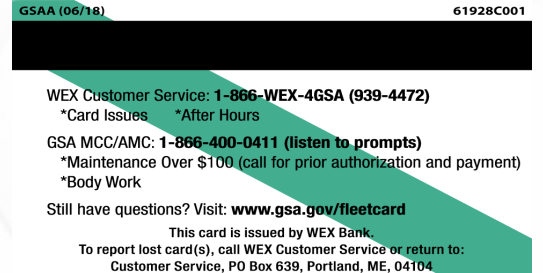

Relieves you of many administrative, management, and functional responsibilities of total fleet asset management

Allows you to focus time & resources on performance of your core mission

Fleet Service Card

- Issued to every GSA leased vehicle for fuel and maintenance:
 - All work over \$100 requires GSA's PRIOR approval.
 - Vendors using AutoIntegrate are spared calling the MCC.
 - Other must call the MCC/AMC.
 - After-hours call WEX support (on back of card).
 - Half of vehicles now report mileage using telematics, with the rest keying miles at the pump (GORP).

GSA Fleet Assistance Centers

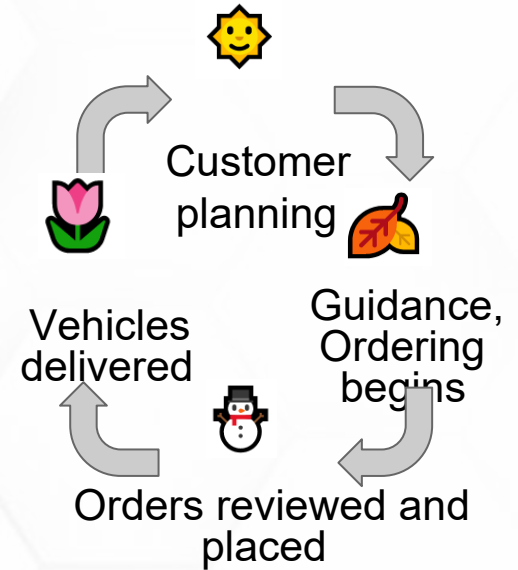

Maintenance Control & Accident Management

- **1-866-400-0411**
- Trained GSA Fleet technicians available 24/7:
 - Authorize maintenance and repair over \$100.
 - Assist customer in filling out accident reports.
 - Ensure vehicles get to the correct repair shop at the best price.

Customers & vehicle operators cannot obligate GSA Fleet (Government) funds to any vendor.

Vehicle Replacement

- Replacement criteria
- Customer Acquisition Module (CAM)
- Approval Process:
Local/Mid/Headquarters
- 28,278 vehicles ordered for leasing program in FY23

Telematics

- Per [EO 14057 Implementing Instructions](#), A mandatory fleet management tool - all executive agencies must "deploy vehicle telematics and collect and use fleet operational data to inform fleet planning and vehicle acquisition strategies."
- Currently installing telematics across the GSA leased fleet.
 - Automated Mileage Reporting and FAST Data provided at no additional cost.
- Newly authorized OEM integrations to scale deployment.
- ProPlus Service (\$13/vehicle/month) for enhanced data capture and fleet management, including access to the [Electric Vehicle Suitability Assessment](#) tool, configurable GPS services, and more.
- www.gsa.gov/telematics

Telematics

- Currently installing telematics across the GSA leased fleet.
- Newly integrating OEM hardware to further adoption.
- Mileage is captured automatically.
- Opt-in service (at an additional cost) for enhanced data capture and fleet management.
- Sessions:
 - Thu: 9:45-10:45 EVSA and Using Telematics for Electrification
 - Thu: 11:00-12:00 Telematics and Fleet Management
 - Thu: 2:15-3:15 Connected Vehicles and Telematics

Short Term Rental

- Rentals for seasonal work, surge requirements and replacements during repairs.
 - Streamlined procurement through GSA Fleet
 - www.gsa.gov/str

BENEFITS

- Lowest available commercial rates
- Easy, hassle-free procurement
- Convenient online request system, available 24/7
- Fuel cards provided
- Separate rental bill
- No fee for additional drivers
- No early turn in penalty

Short Term Rental

- Less than 120 day rentals for vehicles
- Up to 365 day rentals for equipment

VEHICLES	EQUIPMENT
70+ types of available including:	550+ types of available including:
<ul style="list-style-type: none">• Sedans of all sizes• Mini-vans• Passenger and cargo vans• SUVs• Light trucks• Box, flat-bed and stake trucks• Buses (without drivers)• Refrigerated trucks and trailers• Tractors and trailers	<ul style="list-style-type: none">• Aerial Lifting• Compaction• Earth Moving• Forklift and cranes• Generators and electrical• Heating and AC• Trucks and utility vehicles• Light towers• Welders• Dewatering pumps

Fleet Electrification

“We’re going to turn [the Federal] Fleet into a fleet that’s run on electric vehicles.” - President Biden

- GSA is here to support you
 - Offerings, Planning, Infrastructure solutions and more! (gsa.gov/afv & gsa.gov/evse)
- Join us at FedFleet EV Sessions
 - Tue, Wed: 10:00-13:00 EV Ride and Drive, Expo Floor
 - Tue: 1:00-1:30 Fleet Electrification & Data Reporting
 - Tue: 3:15-4:15 EVSE Planning
 - Wed: 9:00-10:00 Consideration for Purchasing a ZEV
 - Wed: 1:45-2:15 Fleet Electrification & Data Reporting
 - Wed: 3:15-4:15 GSA ZEV & EVSE Current & Future Offerings
 - Thu: 8:30-9:30 ZEV Charging
 - Thu: 9:45-10:45 EVSA & Using Telematics for Electrification
 - Thu: 11:00-12:00 Agency Panel on Best Practices on Electrification
 - Thu: 1:00-2:00 EO 14057 & Gov-wide Electrification Progress
 - Thu: 2:15-3:15 EVSE Best Practices: Agency-wide & Site Level
 - Thu: 3:30-4:30 ZEV Planning

Federal Fleet Policy Overview

Patrick McConnell, GSA OGP
Marcerto Simms, GSA OGP

Federal Fleet Management

...a little of this and a little of that!

Motor vehicles are **personal property assets**. Many property managers also manage their agency's federal motor vehicle fleet, travel management, aircraft fleet, real property, mail management, and transportation programs.

What is a Fleet Manager?

- **A Fleet Manager is more than just a manager of personal property assets.**
- **Fleet Managers have a role in every aspect of fleet management- acquisition, in-use management, and disposal.**
- **Fleet Managers exist at all levels in an agency from the field level fleet managers, to the bureau/service level fleet managers to the agency headquarters fleet managers.**
- **Whether you are a fleet specialist, fleet manager or fleet is “other duties as assigned” in your position, you are vital to the success of your agency's fleet program and helping your agency accomplish its mission.**

Roles of the Fleet Manager

- **Manager**
- **Supervisor**
- **Communicator**
- **Financial Budget Analyst**
- **Vehicle Maintenance Technician**
- **Procurement Officer**
- **Environmental Specialist**
- **EV and EVSE Deployment Specialist**
- **Vehicle Disposal Manager**
- **Trainer**
- **Safety Officer**
- **Accident Investigator**
- **Other duties as assigned!**

Sampling of different roles between Agency and Field Level Fleet Managers

Agency Fleet Manager

- Compliance with environmental mandates
- Compliance with fleet reporting requirements- FAST, VAM, OMB-11, etc.
- Fleet replacement and lifecycle costs analysis- where's the money coming from?
- Develop internal agency policy on fleet management
- Manage the HTW program
- Agency VIPs- help!

Field Level Fleet Manager

- Answer data calls from Agency Fleet Manager
- Keeps drivers happy
- Maintain and keep vehicles on the road
- Pickup new vehicles
- Manage vehicle accidents and drivers
- Negotiate local agreements for fuel and maintenance
- Other duties as assigned

How Do Fleet Managers Support Federal Agencies?

Federal Fleet Managers provide agencies with the necessary transportation solutions required for your agency to carry out their mission requirements.

What is Fleet Management?

- Any agency that needs motor vehicles to function engages in some form of fleet operations and fleet management.
- The purpose of fleet management is to oversee all fleet acquisition and disposal activities and in-use management of the motor vehicles including maintenance in order to increase productivity and help your agency meet its mission requirements.
- Federal Fleet Management is regulated by 41 CFR 102-34 Motor Vehicle Management.

Motor Vehicle Management

41 CFR 102-34 Motor Vehicle Management

This part governs the economical and efficient management and control of motor vehicles that the Government owns, leases commercially or leases through GSA Fleet. Agencies will incorporate appropriate provisions of this part into contracts offering Government-furnished equipment in order to ensure adequate control over the use of motor vehicles.

- Plain language, question and answer format
- Defines terms (vehicles types, sources of supply, replacement standards)
- Defines scope (Military design vehicles excluded, law enforcement vehicles excluded from most provisions)

Fleet Management and Vehicle Life Cycle

- Acquisition
- In-Use Management
 - Identification and Registration
 - Official Use
 - Home to Work Transportation
 - Maintenance
 - Crash Management and Reporting
 - Fueling
 - Replacement Criteria
 - Asset Level Data Reporting
- Disposal

Motor Vehicle Management Vehicle Acquisition

41 CFR 102-34 Motor Vehicle Management Subpart B- Obtaining Fuel Efficient Motor Vehicles

- Purchase and lease vehicles that achieve maximum fuel efficiency
- Have body types, engine sizes, and options essential to agency mission
- Establish and document a structured vehicle allocation methodology (VAM)
- Fleet average fuel economy standards published each year by the Department of Transportation (www.dot.gov)

Dive in deeper into VAM at the VAM workshop on Wednesday, at 3:15pm!

Sources for Vehicle Acquisition:

- Rotate vehicles to maximize utilization within your agency
- Pickup excess government vehicles from other agencies
 - GSAXcess.gov
- Short term rentals (less than 120 days)
- Purchase from GSA Fleet (mandatory source for non-tactical vehicles)
- Lease vehicles from GSA Fleet (non-mandatory)
- Lease vehicles from Commercial sources
 - GSA Multiple Award Schedule SIN 532112
- Forfeiture and Seizure (you know who you are...)
 - <https://www.justice.gov/criminal-afmls/file/839521/download>
- Donation

Things to Consider:

- Why do I need a vehicle? Transport people? Cargo? Both?
- When do I need the vehicle?
- How long do I need the vehicle?
- Do I have authority to acquire additional vehicles?
- Have I asked my agency fleet manager for approval?
- What is my funding source- non-appropriated funds or working capital fund?
- If for a mission change, is it documented in my VAM analysis and my agency's optimal vehicle profile?
- Are my available options in compliance with current environmental mandates?
- Have I considered alternatives to using a motor vehicle?

471

One Hundred Seventeenth Congress
of the
United States of America

AT THE SECOND SESSION

Began and held at the City of Washington on Monday,
the third day of January, two thousand and twenty-two

An Act

Making consolidated appropriations for the fiscal year ending September 30, 2022,
and for providing emergency assistance for the situation in Ukraine and for
other purposes.

Be it enacted by the Senate and House of Representatives of
the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Consolidated Appropriations
Act, 2022".

SEC. 2. TABLE OF CONTENTS.

- Sec. 1. Short title.
- Sec. 2. Table of contents.
- Sec. 3. Definitions.
- Sec. 4. Explanatory statement.
- Sec. 5. Statement of appropriations.
- Sec. 6. Adjustments to compensation.

DIVISION A—AGRICULTURE, RURAL DEVELOPMENT, FOOD AND DRUG
ADMINISTRATION, AND RELATED AGENCIES APPROPRIATIONS ACT, 2022

- Title I—Agricultural Programs
- Title II—Farm Production and Conservation Programs
- Title III—Rural Development Programs
- Title IV—Domestic Food Programs
- Title V—Energy Assistance and Related Programs
- Title VI—Related Agencies and Food and Drug Administration
- Title VII—General Provisions

DIVISION B—COMMERCE, JUSTICE, SCIENCE, AND RELATED AGENCIES
APPROPRIATIONS ACT, 2022

“...the purchase of
passenger motor vehicles
for replacement only.”

Motor Vehicle Management In-Use Management

41 CFR 102-34 Motor Vehicle Management Subpart C- Identifying & Registering Motor Vehicles

- Display identification that indicates:
 - “For Official Use Only” & “U.S. Government”
 - Identification of the agency or service that owns or leases the vehicle (seal or tag code)
 - Federal license plate is the preferred location
- Register vehicles in the GSAFleet.gov Vehicle Registration Service
- Obtain US Government license plates from UNICOR

License Plate
Workshop on
Thursday at
1pm with GSA!

Motor Vehicle Management

In-Use Management

41 CFR 102-34 Motor Vehicle Management

Subpart C- Identifying & Registering Motor Vehicles

Exemptions to Government license plates and identification:

- Limited (Agency head authorizes, up to three years) can now include administrative vehicles
- Unlimited (investigative, law enforcement, intelligence, or security duties)
- Special (President & heads of Executive Departments)

Motor Vehicle Management In-Use Management

41 CFR 102-34 Motor Vehicle Management Subpart D- Official Use of Government Vehicles

Official Use is:

**Using a motor vehicle to perform
your agency's mission(s), as
authorized by your agency**

Regs workshop on
Tuesday at 3:15pm
& repeated on
Thursday at 2:15pm.

Personal
liability on
Thursday at
8:30am.

Motor Vehicle Management

In-Use Management

41 CFR 102-34 Motor Vehicle Management

Subpart D- Official Use of Government Vehicles

Driver responsibilities:

- Operate, park, store, and lock as appropriate to prevent theft or damage
- Obey all State and Local traffic laws
- Use all safety devices including seat belts
- Pay any parking fees and fines

Motor Vehicle Management

In-Use Management

41 CFR 102-34 Motor Vehicle Management

Subpart E- Replacement of Motor Vehicles

Minimum replacement standards:

- Sedans - 3 years/60,000 miles
- Buses - Mileage only
- Trucks - By class, 6 years/50,000 miles minimum

Motor Vehicle Management

In-Use Management

41 CFR 102-34 Motor Vehicle Management

Subpart I- Motor Vehicle Fueling

Obtain fuel by:

Government charge card, fuel facility, or reimbursement (See OMB Circular A-123 for Gov't. charge card guidance)

Refuel using:

The fuel type & minimum grade recommended by the vehicle manufacturer

Fleet Card
Workshop on
Thursday at
8:30am!

Motor Vehicle Management In-Use Management

41 CFR 102-34 Motor Vehicle Management Subpart J- Federal Motor Vehicle Fleet Report

The Federal Fleet Report (FFR) compiles:

- Inventory, Acquisition, Cost, Mileage and Fuel Use data for Federal motor vehicles
- Reported annually through the Federal Automotive Statistical Tool (FAST) <http://fastweb.inel.gov>
- FAST also used to submit data for Energy Policy Act (DOE) & OMB Circular A-11 Budget (OMB)

FAST
workshop on
Thursday at
9:45am!

Motor Vehicle Management Disposal

41 CFR 102-34 Motor Vehicle Management Subpart H- Disposal of Motor Vehicles

Transfer ownership as follows:

SF 97-1 - "U.S. Government Certificate to Obtain Title to a Motor Vehicle" (Other forms may be required by jurisdiction)

Consult the following regulations for detailed instruction:

41 CFR Part 102-38 "Sale of Personal Property"

41 CFR Part 102-39 "Replacement of Personal Property Pursuant to the Exchange/Sale Authority"

Regulatory Bulletins

Informational in nature-- Guidance, not mandates

FMR B-2	Use of Hand-held Wireless Telephones

Access the latest [Motor Vehicle Management advisory bulletins](#)

Managing an Overseas Fleet

Some things to consider when managing an overseas fleet:

- The US Government is self-insured. Many countries do not recognize the US Government's self-insurance and require private insurance on vehicles and drivers. If you are military, is your mission covered by a Status of Fed Fleet Forces agreement (SOFA)?**
- The Federal Tort Claims Act only protects Federal employees from personal liability in the US.**
- Seek Guidance from the General Services Office (GSO) at the post.**

The State Department's Foreign Affairs Manual is available online:

<https://fam.state.gov/FAM/14FAM/14FAM0430.html>

OPM Regulates Drivers, not GSA

- **CFR Title 5 Part 930**
 - **Programs for Specific Positions and Examinations (Miscellaneous)**
 - **Subpart A- Motor Vehicle Operators**
 - **Definitions**
 - **Medical Examinations**
 - **Authorizations**
 - **Corrective Actions**
- **Does your agency internal policies on drivers reference this regulation?**

National Archives and Records Administration (NARA) GRS 5.4 Facility, Equipment, Vehicle, Property and Supply Records

Formerly known as General Records Schedule 10 Motor Vehicle and Aircraft Maintenance and Operations Records

<https://www.archives.gov/files/records-mgmt/grs/grs05-4.pdf>

Transmittal No. 27
January 2017

General Records Schedule 5.4

GENERAL RECORDS SCHEDULE 5.4: Facility, Equipment, Vehicle, Property, and Supply Records

This schedule covers records Federal agencies create and receive while managing, operating, and maintaining Government-owned and -leased real property, facilities, equipment, vehicles (land, water and air), personal property, and supplies. This includes allocating space and managing supply stock.

Item	Records Description	Disposition Instruction	Disposition Authority
010	<p>Facility, space, vehicle, equipment, stock, and supply administrative and operational records.</p> <p>Records relating to administering and operating facilities, spaces, Federally owned and operated housing, land vehicles, water vessels, equipment, stocks, and supplies. Includes:</p> <ul style="list-style-type: none">• statistical and narrative reports• studies• requests for space using Standard Form 81 or equivalent• space assignments and directories• inventories of property, equipment, furnishings, stock, and supplies• reports of survey regarding lost, damaged, missing, or destroyed property• requisitions for supplies and equipment• records tracking supply and procurement requirements• records scheduling and dispatching vehicles, monitoring use, and reporting use• related correspondence <p>Exclusion 1: Records of aircraft operations (item 110 in this schedule covers these).</p> <p>Exclusion 2: Records of supply and property procurement (GRS 1.1, item 010 covers these).</p> <p>Exclusion 3: Requisition and supply records of the General Services Administration's GSA Global Supply program and Defense Logistics Agency records on military supply provision (supply is these agencies' mission so they must schedule the records separately).</p>	<p>Temporary. Destroy when 3 years old or 3 years after superseded, as appropriate, but longer retention is authorized if required for business use.</p>	DAA-GRS-2016-0011-0001

Where do I go for policy questions in my agency?

- **Agency Fleet Manager**
- **Agency General Counsel's office**
- **Agency Directives and Guidance Documents**
- **Agency Travel Manager**
- **Contracting Officer with regards to contractor use of GOVs**

Don't forget your most valuable resource to ask for assistance besides your agency's General Counsel's office and your agency fleet manager.....

Your Fellow Fleet and Property Managers!

<https://www.gsa.gov/policy-regulations/policy/vehicle-management-policy/agency-fleet-manager-information>

Let's talk more about your role as a communicator

Effective communication between the agency fleet manager to senior management to the field fleet managers to drivers is **CRITICAL** to a successful fleet program.

It's key to successfully influencing driver behavior and introducing new initiatives.

Agency **DRIVERS** are focused on the mission, not vehicle management!

Use the **resources and training opportunities** offered by GSA and DOE! Key factors to a successful fleet electrification program at your agency is communication with and training the drivers! Range anxiety is real folks!
Educate and inform your drivers of the benefits of EVs.

Ways to Communicate

- Agency and bureau level fleet handbooks
- Driver packets in vehicles
- Agency intranet pages
- Agency training workshops on fleet management
- Mini-training session on vehicle pickup days
- Agency broadcast emails on hot fleet topics
- Agency social media pages with fleet articles and info blasts
- Fleet Specific events at HQ and the field level (Earth Day, Driver Safety Week, etc.)
- Agency videos on driving GOVs
- Send posters out to the field on the do's and don'ts when driving a GOV
- Regularly scheduled working groups between HQ, Field and Drivers
- Driver and field fleet manager incentives
- Fleet email box for questions

What now?

- **Know your inventory**
- **Meet your customers and understand their missions**
- **Manage your budget**
- **Explore alternate forms of transportation**
 - **Public transportation**
 - **Motor pool/car sharing**
 - **Interagency sharing**
 - **POV**
 - **Uber, Lyft**
- **Communicate- internally and externally**
- **Ask for help!**

**You've Got Motor Vehicle Policy Questions?
We've Got Answers**

vehicle.policy@gsa.gov
www.gsa.gov/vehiclepolicy

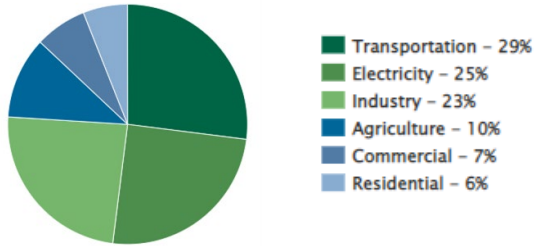

EISA §141 – Federal Fleet Low GHG Emitting Vehicle Mandate

Kristin Kenausis
January 22, 2024

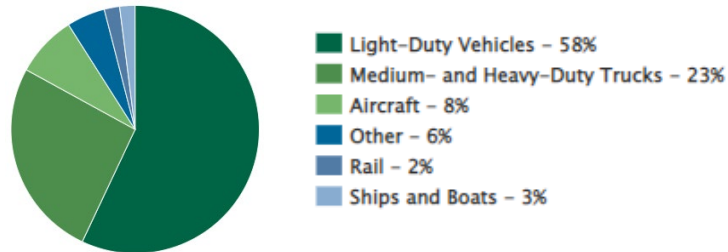

Why mandate low GHG emitting vehicles?

2021 U.S. GHG Emissions by Sector

- Transportation #1 for GHG emissions
- Light duty vehicles #1 in transportation sector

2021 U.S. Transportation Sector GHG Emissions by Source

The Federal Fleet can lead by example by lowering their GHG footprint.

EISA §141 – Requirements

What does EISA §141 require?

1. All covered vehicles acquired by all branches of the Federal government **must be** low GHG-emitting vehicles.
2. EPA determines criteria for low GHG-emitting vehicles each model year.

Which vehicles are covered?

1. EISA §141 applies to all individual light-duty and medium-duty passenger vehicles and light-duty trucks
2. Provides for individual vehicle exceptions
 - ✓ Functional Need
 - ✓ Alternative Measures

Type of Vehicle	
Light Duty Vehicles	✓
Medium Duty Passenger Vehicles	✓
Heavy Duty Vehicles	✗

EISA §141 – Allowable Exceptions

1. Functional Need

May buy non-EISA §141 compliant vehicles to perform duties/functions for which there is no acceptable low GHG emitting vehicle.

2. Alternative Measure

May implement cost-effective alternative measures that result in an equivalent amount of GHG emission reductions.

- *E.g.*, buying a 2024 Chevy Bolt (EISA §141 compliant) gives you flexibility to buy a 2024 GMC Terrain (not EISA §141 compliant)

Agency head, or designee, must certify each exception

EISA §141 – Responsibilities

EPA is required to

1. Analyze fleet data each model year (MY) to determine criteria for low GHG emitting vehicles for the subsequent MY
2. Provide a list of EISA §141 compliant vehicles each MY

Federal Fleet Managers are required to

1. Ensure all covered vehicles acquired by your agency or office are either:
 - Low GHG-emitting for the model year OR
 - Fall under one of the two allowable exceptions
2. Maintain the files for your certified use of exceptions
3. Enter accurate EISA §141 compliance data in FAST

Defining a Low GHG-Emitting Vehicle

- The CO₂ g/mile level is set so that [approx.] 25% of cars and LD trucks will be designated low GHG-emitting

EISA §141 Compliance Thresholds (maximum grams/mile of CO ² emissions)			
Vehicle Type	MY 2022	MY 2023	MY 2024
Passenger Cars	260	250	245
Light-duty Trucks, MPPVs	360	345	330

EISA §141: FAST Data

1. Ensure data is robust.
2. Ensure only reasonable use of functional needs exception. (FUN)
3. Avoid the use of the noncompliance (NON) option.
4. Use N/A for heavy duty vehicles (see slide #2)

	N/A	YES	NON	FUN	ALT	FOR	NMD	LAW	GLR	Total	Compliance
	226	40	238	0	0	0	0	0	0	504	14.4%
	1,051	221	617	819	0	5	0	8	0	2,721	62.8%

EISA §141: FAST Data

Good news! FY22 data continues to show improvement

Overall Reported EISA §141 Compliance in FAST							
FY15	FY16	FY17	FY18	FY19	FY20	FY21	FY22
66%	65%	58%	59%	59%	47%	67%	69%

*Compliant vehicles include those acquired with functional needs or alternative measures exceptions

- EPA publishes most recent compliance levels by agency on our website annually
- May also choose to publish data on EPA's social media accounts

EISA §141: FAST Data

- FY 2022 EISA §141 Fed Fleet Compliance Level = **69%** (per FAST)

REPORTED EISA 141 PROGRAM COMPLIANCE FOR FY22			
>95%	80-95%	50-80%	<50%
DEPT OF LABOR DEPT OF STATE DEPT OF TREASURY DOT EPA NASA SOCIAL SECURITY ADMIN TENNESSEE VALLEY AUTHORITY U.S. POSTAL SERVICE	DEPT OF STATE HOMELAND SECURITY VETERANS AFFAIRS GSA	DEFENSE AGENCIES DEPT OF AGRICULTURE DEPT OF ENERGY DEPT OF THE INTERIOR NATIONAL ARCHIVES SMALL BUSINESS ADMINISTRATION SMITHSONIAN USAID	CORPS OF ENGINEERS, CW DEPTS OF AIR FORCE, ARMY, NAVY, MARINE CORPS DEPT OF COMMERCE DEPT OF EDUCATION DEPT OF JUSTICE HHS HUD NSF OPM USAID

EISA §141 & Executive Order #14057

EO #14057 Goal – Fed Fleet transition to ZEVs

- 100% LD acquisitions by 2027
- 100% MD/HD acquisitions by 2035

How does this affect EISA 141?

- ZEVs have no tailpipe emissions!
- EISA §141 mandate fills gap until EO is fully implemented
- EISA §141 remains in place for the judicial and legislative branches (Senate exception)

EV Basics

Electric & Plug-In Hybrid Electric Vehicles

Electric vehicles (EVs) have a battery instead of a gasoline tank, and an electric motor instead of an internal combustion engine. Plug-in hybrid electric vehicles (PHEVs) are a combination of gasoline and electric vehicles, so they have a battery, an electric motor, a gasoline tank, and an internal combustion engine. PHEVs use both gasoline and electricity as fuel sources.

[More on PHEVs.](#)

Watch the video to learn how electric vehicles and different types of plug-in hybrid electric vehicles work.

Visit [EV Myths](#) to learn even more facts about electric vehicles.

Emissions

EVs produce no tailpipe emissions. While charging the battery may increase pollution at the power plant, total emissions associated with driving EVs are still typically less than those for gasoline cars—particularly if the electricity is generated from renewable energy sources like wind.

PHEVs produce tailpipe emissions when gasoline is being used as a fuel source.

To estimate the greenhouse gas emissions associated with charging and driving an electric or plug-in hybrid electric vehicle where you live, visit our [Greenhouse Gas Emissions for EVs and PHEVs Calculator](#).

[Sign up for E-Updates](#)

3-minute video on how EVs work

Comparison: Your Car vs. an Electric Vehicle

How does your gasoline vehicle compare to a typical electric vehicle for greenhouse gas emissions?

Input your vehicle's approximate miles per gallon (MPG) and annual mileage below. Results show annual carbon dioxide (CO₂) emissions in metric tons.

Comparison: Your Car vs. an Electric Vehicle

Your Car's MPG Your Annual Mileage

Input your average (gas) MPG and annual mileage → See how your GHG emissions compare to an average EV

EV Charging: From the Basics to the Details

Charging My Electric Vehicle

Level 1

- Charging cord is typically provided with electric vehicle (EV) purchase.
- Adaptor/charger plugs into a standard wall outlet.
- Provides about 5 miles per hour of charging.
- Great option for overnight charging.

120 Volts

Level 2

- Faster charge than Level 1.
- Provides about 25 miles per hour of charging.
- If you have a long daily commute, consider installing a Level 2 charger at home.
- Consult with an electrician to install a Level 2 charger at home.
- Level 2 charging can also be found at some workplaces and parking garages. Visit Department of Energy's (DOE's) [station locator](#) to find Level 2 charging locations near you.

240 Volts

DCFC

- DCFC - Direct Current Fast Charging.
- Fastest way to charge your vehicle.
- Provides about 100-200+ miles per 30 minutes of charging.
- Many newer EVs have the capability of taking a fast charge.
- Three types of connectors. The type of connector your EV takes depends on the manufacturer and model.
- DCFC is available at some public charging stations. Visit DOE's [station locator](#) to find up-to-date DCFC locations.

Plug-in Electric Vehicle Charging: The Basics

Charging your all-electric vehicle (EV) or plug-in hybrid electric vehicle (PHEV)—together known as plug-in electric vehicles (PEVs)—is similar to charging other electronics. One end of an electrical cord is plugged into a power source or charging equipment.

There are three categories of charging equipment based on how quickly each can recharge a car's battery. Charging times for PEVs are also affected by:

- How much the battery is depleted
- How much energy the battery can store
- The temperature of the battery
- Ten

Frequent Questions about Plug-In Electric Vehicle (PEV) Charging

- [Can I use any charger?](#)
- [Is my PEV-charging experience similar to filling up my car at a gas station?](#)
- [What does it mean when some chargers list amperage \(amps\) and some list kilowatts \(kW\)?](#)
- [How do I pay to charge my PEV?](#)
- [Can I get reimbursed for installing a charger at home or at my workplace?](#)
- [How does the cost of charging compare to gasoline?](#)

Volts, Amps, and Watts. Oh My.

Voltage (Volts): The measure of electrical potential. Like pressure, it measures how strongly electricity is being "pushed" through a circuit. Volts = watts / amps.

Amperage (Amps): The measure of the flow of electricity. Like volume, it measures how much electrical charge is moving past a given point in one second. This term is used when describing the amount of electric current that a circuit can provide. Amps = watts / volts.

Kilowatt (kW): The measure of electrical energy that is equal to 1,000 watts. A 50kW charger is five times more powerful than a 10kW charger. Using a water pipe analogy, it refers to how much water (or energy) is flowing through a pipe at any point in time.

Kilowatt-Hour (kWh): The measure of how much electrical energy flows (generally used or dispensed) over one hour. Using a water pipe analogy, you can think of kWh as the equivalent to how much water comes out of the pipe and into a bucket in one hour. The size of a PEV battery is measured in kWh, which describes the total energy capacity. If the useable battery capacity is 100 kWh, and the vehicle gets two miles per kWh, then the range would be 200 miles per charge. kWh = (kW × hours).

EV Myths

Electric Vehicle Myths

On this page:

- [Myth #1: Electric vehicles are worse for the climate than gasoline cars because of power plant emissions.](#)
- [Myth #2: Electric vehicles are worse for the climate than gasoline cars because of battery manufacturing.](#)
- [Myth #3: The increase in electric vehicles entering the market will collapse the U.S. power grid.](#)
- [Myth #4: There is nowhere to charge.](#)
- [Myth #5: Electric vehicles don't have enough range to handle daily travel demands.](#)
- [Myth #6: Electric vehicles are too expensive.](#)
- [Myth #7: Electric vehicles are too slow.](#)

Myth #3: The increase in electric vehicles entering the market will collapse the U.S. power grid.

- **FACT: Electric vehicles have charging strategies that can prevent overloading the grid, and, in some cases, support grid reliability.**

It is true that the increasing number of electric vehicles (EVs) on the road will lead to increased electricity demand. Yet, how that impacts the grid will depend on several factors, such as the power level and time of day when vehicles are charged, and the potential for vehicle-to-grid (V2G) charging³ among others.

Myth #2: Electric vehicles are worse for the climate than gasoline cars because of battery manufacturing.

- **FACT: The greenhouse gas emissions associated with an electric vehicle over its lifetime are typically lower than those from an average gasoline-powered vehicle, even when accounting for manufacturing.**

Some studies have shown that making a typical EV can create more carbon pollution than making a gasoline car. This is because of the additional energy required to manufacture an EV's battery. Still, over the lifetime of the vehicle, total GHG emissions associated with manufacturing, charging, and driving an EV are typically lower than the total GHGs associated with a gasoline car. That's because EVs have zero tailpipe emissions and are typically responsible for significantly fewer GHGs during operation (see Myth 1 above).

For example, researchers at Argonne National Laboratory estimated emissions for both a gasoline car and an EV with a 300-mile electric range. In their estimates, while GHG emissions from EV manufacturing and end-of-life are higher (shown in orange below), total GHGs for the EV are still lower than those for the gasoline car.

FY 2022 Federal Fleet Compliance Summary

	<i>Requirement</i>	<i>FY 22 Performance</i>
<i>EISA §142 Petroleum Reduction</i>	Reduce annual petroleum use by 20% from FY05 baseline	 -3.3% 24 of 28 covered agencies achieved compliance
<i>EISA §142 Alternative Fuel Use</i>	Increase alternative fuel use by 10% from FY05 baseline (greater than 5% of total fuel use)	 -11.4% 4 of 28 covered agencies achieved compliance Alternative fuel 1.9% of total fuel use
<i>EPAct 92 AFV Acquisitions</i>	75% of “covered” light-duty vehicle (LDV) acquisitions must be AFVs	 61% 21 of 28 covered agencies achieved compliance

Petroleum Reduction: Most Agencies Achieved Targets

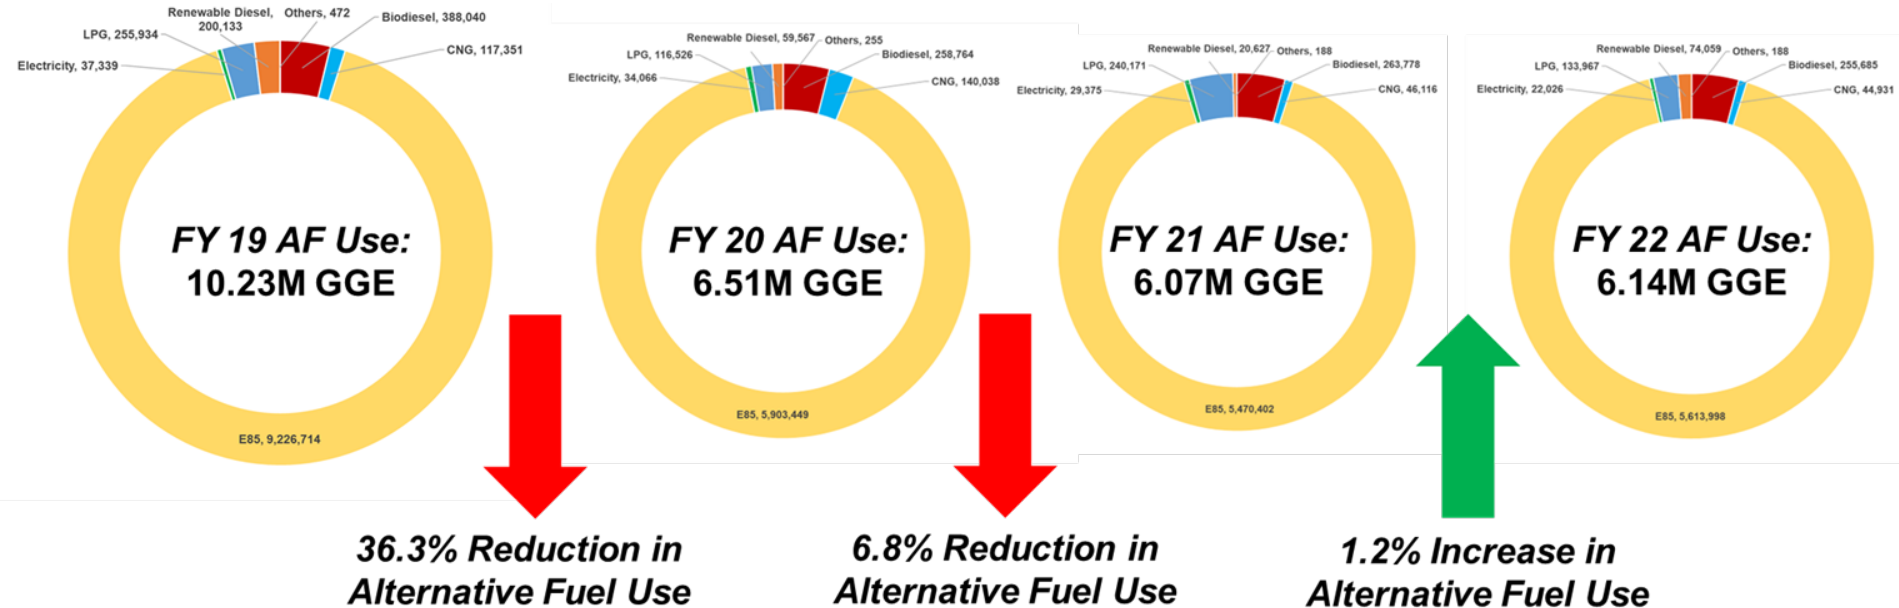

Most agencies (**24 of 28**) reduced petroleum use by more than 20% from their FY05 baseline

Only 6 agencies reduced petroleum use compared to FY21 (overall 4.5% increase)

Increased petroleum use for one agency drove overall Federal fleet petroleum use increase

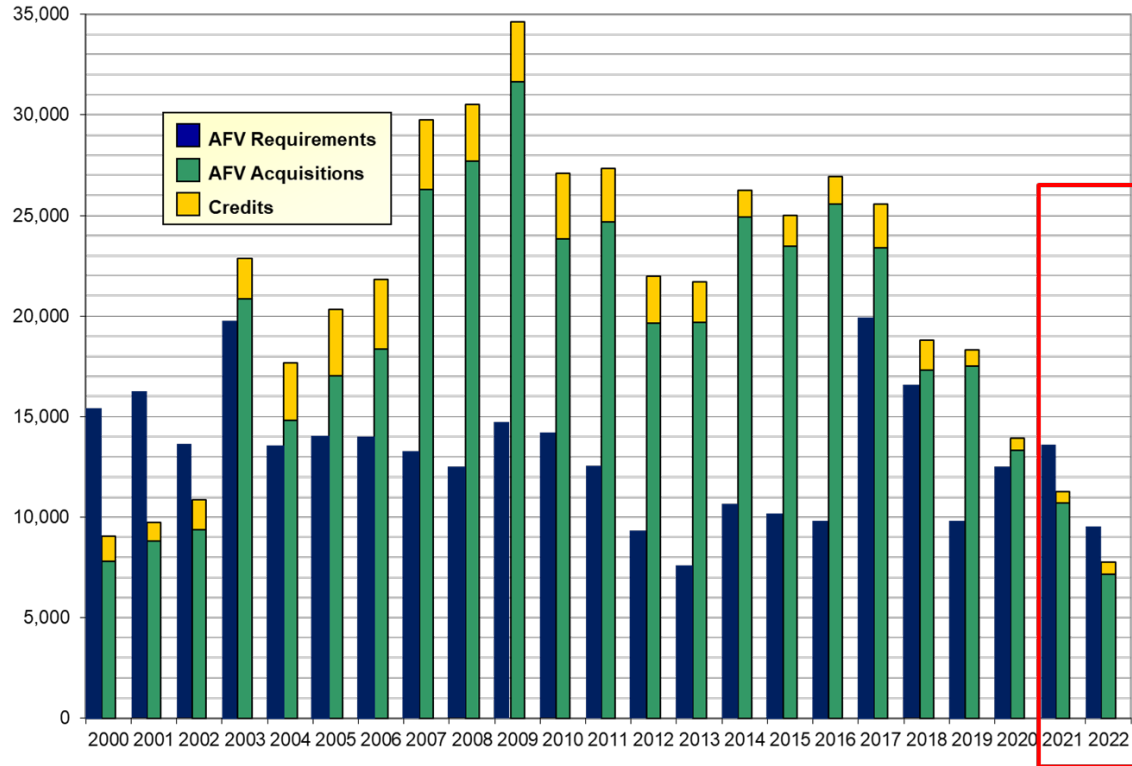

Excluding this agency results in 41% overall Federal fleet reduced petroleum use compared to FY05 baseline

Alternative Fuel: Lower Use Trend Continues

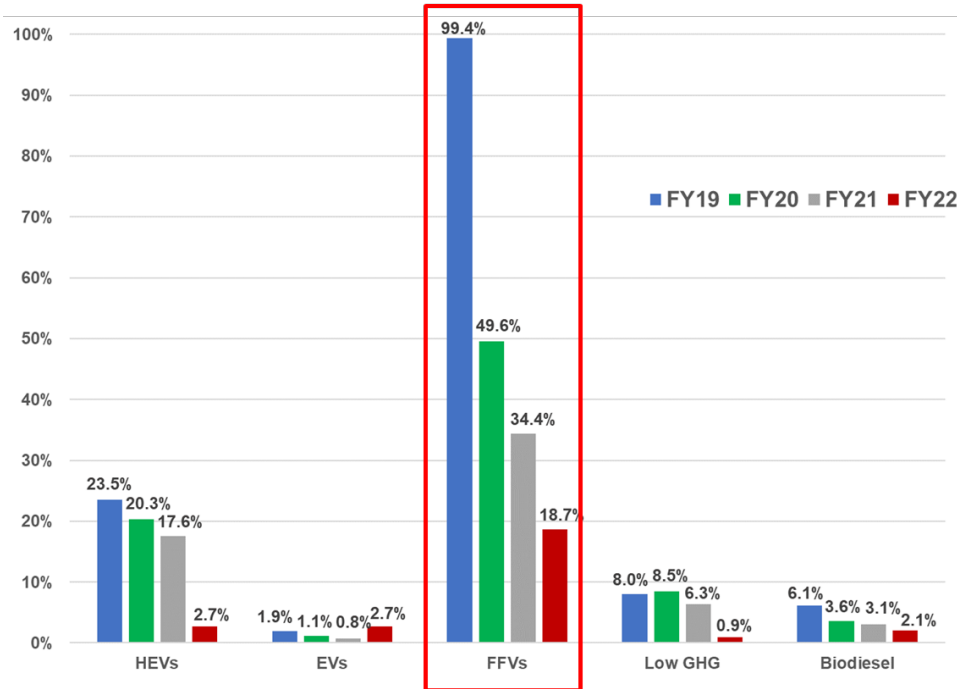

- For some agencies, alternative fuel decreases far greater than petroleum decreases
- E85 reductions since FY19 driving alternative fuel performance
- Electricity, LPG, and Biodiesel use remained steady or increased

AFV Acquisitions: FY00 to FY22

AFV Acquisitions: Continued Lower E85 FFVs Credits

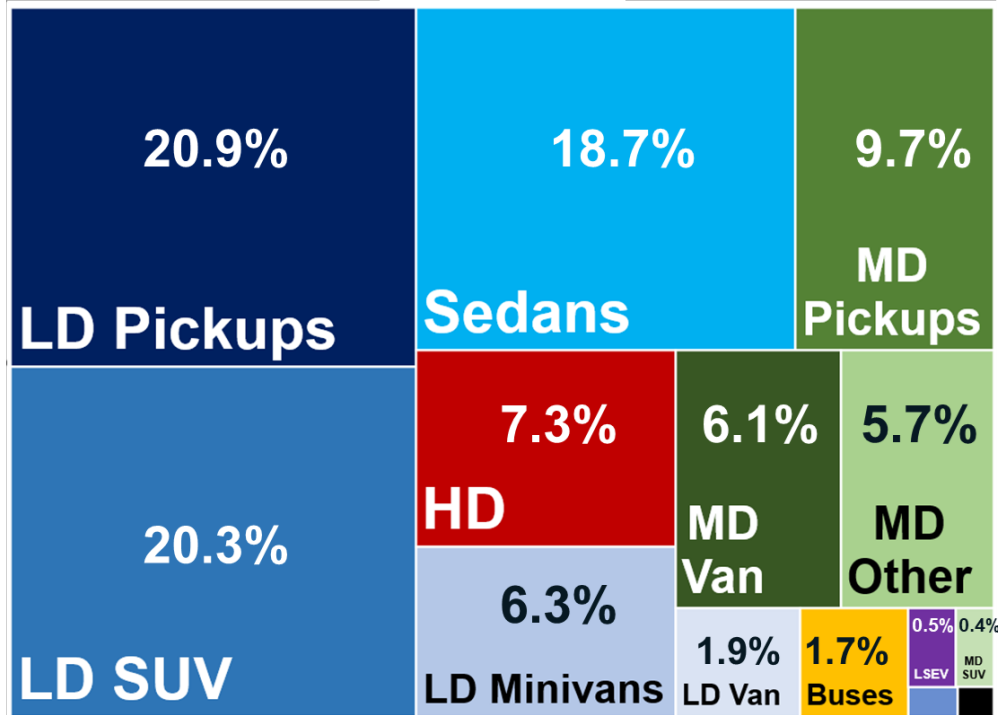

EPAct AFV Acquisition Credits as Percent of Covered Acquisitions by Credit Type

- EPAct compliance fell from:
 - 142% in FY19 to
 - 83% in FY20 to
 - 62% in FY21 to
 - 61% in FY22
- E85 FFV acquisitions primary reason for reduced credits
- All other categories of AFV credits lowered slightly, with exception of EVs

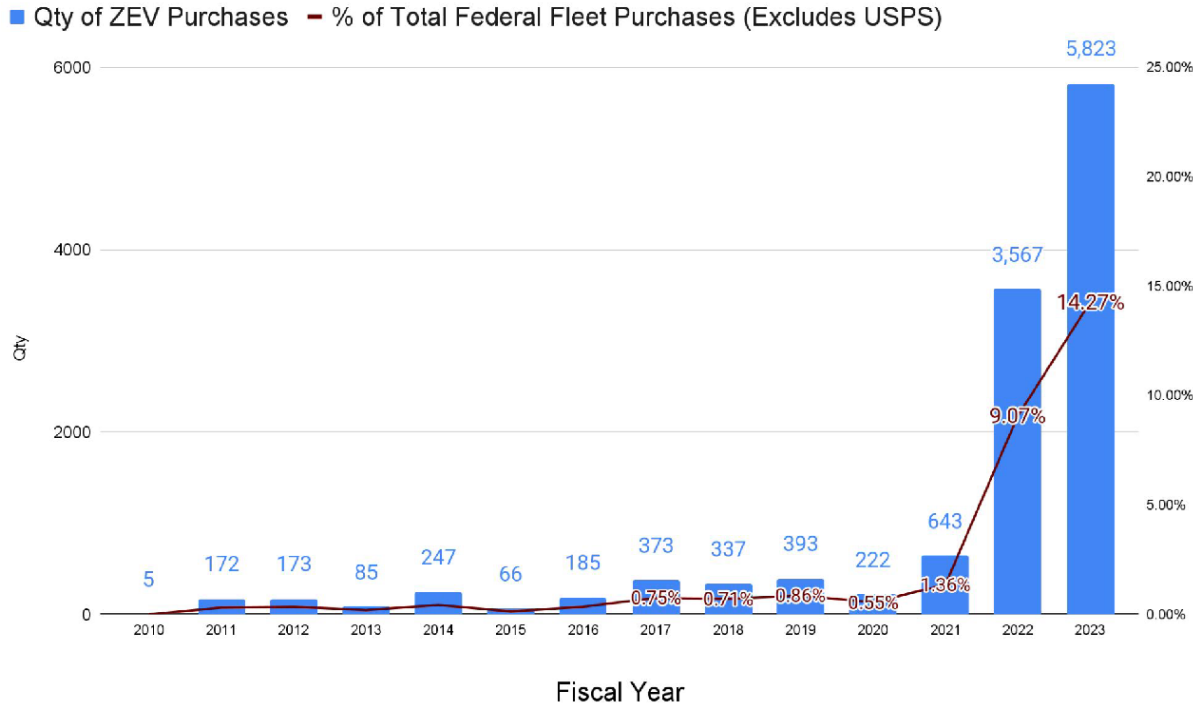

What Types of Vehicles Comprise the Federal Fleet?

FY22 Federal Fleet Composition by Vehicle Type (Excluding USPS)

Three primary vehicle types (*LD Pickups, LD SUVs and Sedans*) represent ~60% of non-USPS fleet

Federal Fleet ZEV Acquisition Progress in FY23

- The Federal Fleet ordered **5,823 ZEVs in FY23**
- Represents **14.3% of total orders** and **17.9% of total light-duty orders**

Current Available ZEVs from GSA by Vehicle Type

Federal Fleet Requirements Resource Center

Overview of Fleet Statutory Requirements

Provides a high-level summary of federal fleet statutory requirements.

Applicability to Federal Agencies

Details applicability of fleet requirements to federal agencies and vehicles.

Reporting

Provides information on the GSA FMR on fleet management information systems.

Petroleum Reduction

Provides EISA § 142 requirements and resources for petroleum reduction.

Alternative Fuel

Provides EISA § 142 and 246 and EAct 2005 § 701 requirements related to alternative fuel.

Vehicle Acquisition

Provides EAct 1992, EISA § 141, and GSA FMR Part 102-34 requirements related to acquiring vehicles.

Best Practices: Fleet Management Framework

FEMP recommends a framework for fleet managers to develop, implement, and execute an overall fleet-specific petroleum reduction strategy.

Best Practices: Sustainable Fleet Core Principles

FEMP recommends best practices to right-size fleets, reduce miles traveled, improve efficiency, and more.

Electric Vehicle Resources

ZEV Ready Center

Provides a process and guide to help federal fleet and facility managers deploy zero-emission vehicles and electric vehicle supply equipment.

Electric Vehicle Training

Attend live trainings, access on-demand courses, and watch videos to develop expertise in fleet electrification.

Fleet Electrification Success Stories

Examples of successful electric vehicle adoption and electric vehicle supply equipment installation throughout the federal fleet.

EV Toolkit

Resources including a fleet electrification checklist, utility finder, and more.

Acquiring Vehicles and EVSE

Information related to electric vehicles and electric vehicle supply equipment acquisition.

Managed Charging, Bidirectional Charging, and EVs for Mobile Storage

Describes EVSE and EVs as load management energy conservation measures and provides procurement information.

EV and EVSE Reporting

Summarizes statutory requirements and offers FEMP tools and best practices.

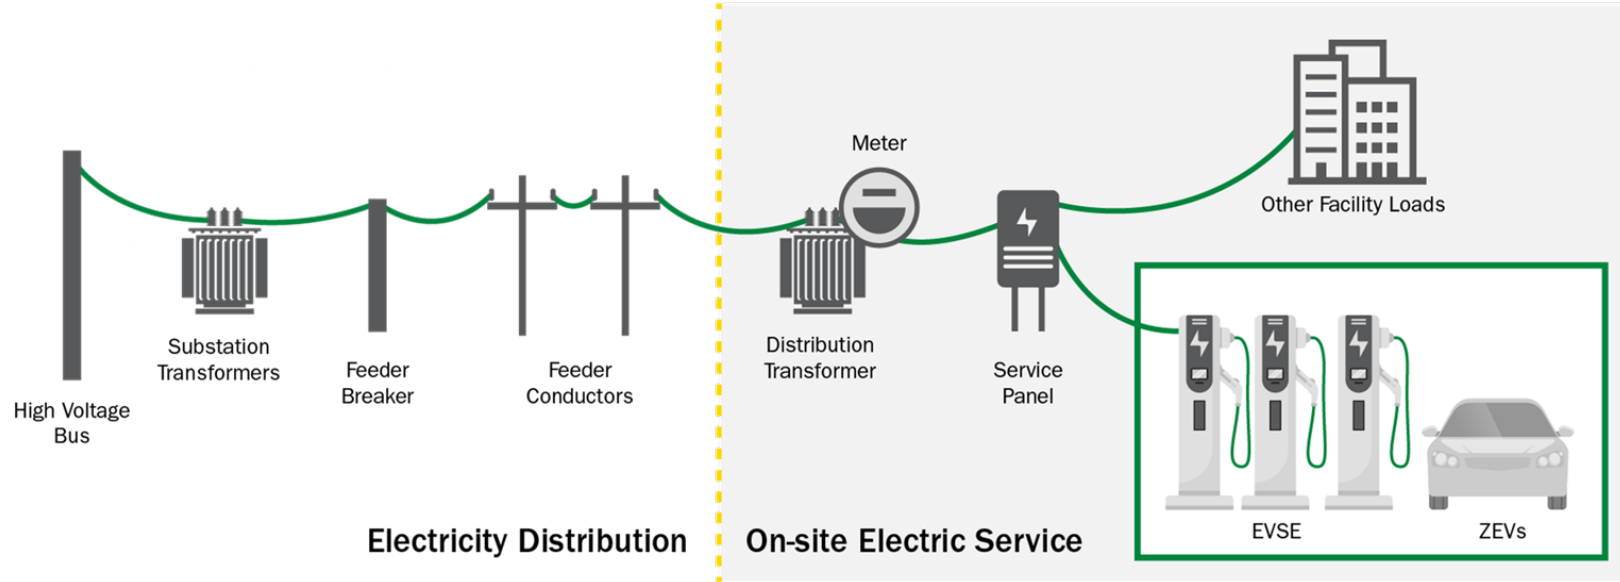

Charging Program Guide

Offers details for agency facility managers, transportation personnel, employees, and vendors regarding the charging of electric vehicles at government-owned and leased buildings.

Federal Fleet ZEV Ready Center

Site-level fleet electrification doesn't just happen

What is “ZEV Ready”?

The ZEV Ready Solution

Framework to simplify and guide fleets through the **process** to electrify each fleet location

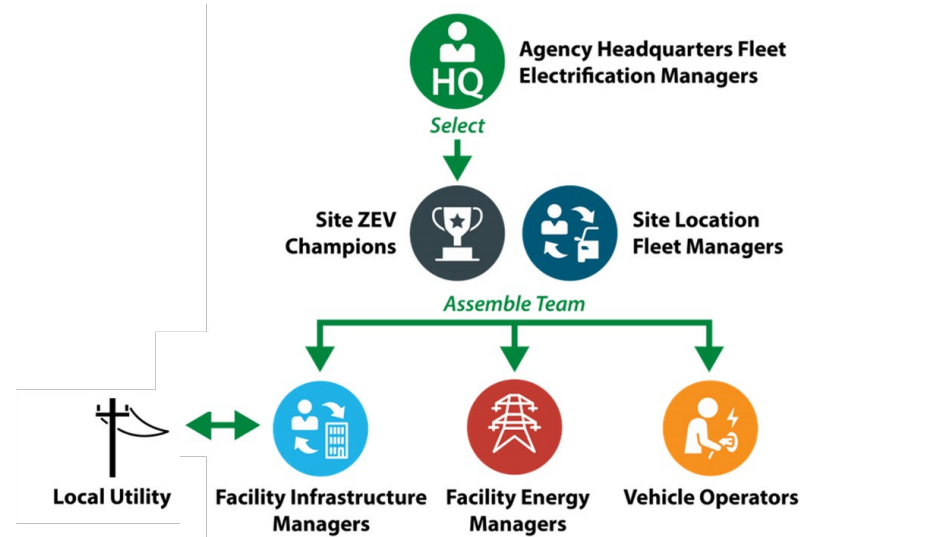

Teamwork and Coordination

The ZEV Ready Solution

Helps sites **engage and form a team** of key electrification stakeholders

Supports **coordination and collaboration**

Guidance and Tools

The ZEV Ready Solution

Integrates with web-based guidance targeted to each stakeholder's needs

Centralized access to **FEMP/GSA fleet electrification resources**

Federal Fleet ZEV Ready Center

Federal Energy Management Program

Federal Energy Management Program > Facility & Fleet Optimization > Fleet Electrification & Optimization > Electric Vehicles > Federal Fleet ZEV Ready Center

The Federal Energy Management Program's (FEMP's) Federal Fleet ZEV Ready Center provides a process and guide to help federal fleet and facility managers select and acquire zero-emission vehicles (ZEVs) and electric vehicle supply equipment (EVSE)—or electric vehicle (EV) charging stations—for their fleet.

Download the **ZEV Ready Tracker** and email **Federal Fleets** to begin the ZEV Ready designation process.

Federal Motor Vehicle Fleet Data Reporting

Ron Stewart
FAST Support Team
Idaho National Laboratory

 www.gsa.gov/FedFleet

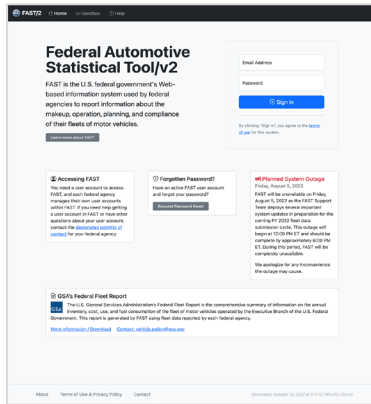

Why do we report fleet data?

- **Lots of different requirements for Federal vehicle fleets**
 - EPACK, EISA, FAST Act, A-11, EO, FMR, ...
- **Different Federal stakeholders have oversight roles**
 - GSA, DOE, OMB, CEQ, EPA, ...

How do we report fleet data?

FAST: Federal Automotive Statistical Tool

PARTNERS

U.S. DOE Federal Energy Management Program

U.S. GSA Office of Government-wide Policy

Idaho National Laboratory

Additional Stakeholders

Office of Management & Budget

Council on Environmental Quality

U.S. Environmental Protection Agency

What fleet data do we report?

- **Annually...**

- Fleet data submission (make-up and operation of vehicle fleet) – due mid-December
- Fueling center & EVSE inventory – due mid-November
- Fleet budget submission & management plans – due August

- **Quarterly...**

- EVSE deployment submission (planning and deployment of EVSE) – due end of quarter

- **As-needed...**

- Optimal fleet profile from Vehicle Allocation Methodology (VAM) studies

Where can we learn more? ... get help?

- Your HQ fleet manager!

- FAST Support Team
FASTsupport@inl.gov
- Federal Fleet Community
FedFleet, INTERFUEL, FEVAR

Federal Automotive Statistical Tool/v2

FAST is the U.S. federal government's Web-based information system used by federal agencies to report information about the makeup, operation, planning, and compliance of their fleets of motor vehicles.

[Learn more about FAST](#)

Accessing FAST
You need a user account to access FAST, and each federal agency manages their own user accounts within FAST. If you need help getting a user account in FAST or have other questions about your user account, contact the designated point of contact for your federal agency.

Forgotten Password
Have an active FAST account and forgot your password?

GSA's Federal Fleet Report
The U.S. General Services Administration's Federal Fleet Report (FFR) is an annual inventory, cost, use, and fuel consumption of the U.S. Federal Government. This report is generated by FAST using the FAST data.

[More Information / Download](#) [Contact: vehicle.policy@gsa.gov](#)

FAST Help Home Background Resources FAQs Glossary News Contact

Home / Background

Background: Overview and History

What is FAST?

FAST is a Web-based data collection tool focused on the U.S. federal government's fleet of motor vehicles. FAST is jointly managed and funded by

- the Office of Government-wide Policy (OGP) within the U.S. General Services Administration (GSA)
- the Federal Energy Management Program (FEMP) within the U.S. Department of Energy (DOE)

From 2002 to 2010, the Office of Consumption and Efficiency Statistics (CES) within the U.S. Energy Information Administration (EIA) also participated in the management and funding of the FAST program.

FAST collects information from all organizations within the Federal government who own or operate motor vehicles. This data is collected through several annual "data calls," each focusing on different aspects of the operation, management, funding, and compliance of the vehicle fleet with a variety of requirements. GSA and DOE use the data collected through FAST to meet their own reporting and oversight responsibilities.

FAST's technical and user support is provided by personnel from DOE's Idaho National Laboratory (INL).

What Information Do Federal Agencies Report to FAST?

Federal agencies currently provide information covering various aspects of the make-up and operation of their motor vehicle fleets during several data calls at different times during the year.

By December 15 each year, agencies are required to report information from the previous **fiscal year**, including

- the type and location of vehicles within their fleets at any point during the fiscal year (including vehicles acquired during the year and vehicles disposed of during the year), along with various other vehicle attributes important from a management or compliance standpoint;
- costs associated with acquiring and operating those vehicles;
- miles traveled by those vehicles;
- cost, type, and amount of fuel consumed by those vehicles;
- information about **electric vehicle suidly equipment (EVSE)** supporting Federal fleet vehicles and/or employee workplace charging (implemented initially for FY 2016 reporting); and
- information about any fueling centers the agency operates for Federal motor vehicle fleets, including the location of each fueling center and the types of fuel available at each fueling center; this information is used in evaluating compliance with **49 CFR 2007 Section 246's** requirements for infrastructure supporting renewable fuels at fuel centers and in evaluating **EPAct 2005 Section 701** waivers fueling center information is submitted in conjunction with the above EVSE inventory beginning FY 2020, prior to FY 2020, this information was submitted separately in June each year; and

By late August each year, agencies are required to finalize their future-year fleet acquisition and disposal projections and the corresponding budget projections through FAST in support of **GMB Circular A-11, "Preparation, Submission, and Execution of the Budget."**

Each quarter, agencies covered by **EO 14652** are required to provide updated information on the status and progress of projects to plan, design, install, and activate EVSE in support of the EO's goals for transitioning the Federal vehicle fleet to zero-emission vehicles. These quarterly submissions are due by the last day of October, December, March, and September of each fiscal year.

Although not required annually or due by a specific date each year, each agency is also required to submit a copy of their current optimal fleet profile through FAST. The optimal fleet profile is a high-level summary of the smallest, most efficient, most cost-effective fleet capable of meeting the agency's mission and which complies with all fleet-related requirements. The optimal fleet profile is a product of the agency's vehicle allocation methodology study, which agencies are required to complete at least every five years (or more frequently, if mission change or agency processes merit).

Visualizing your Fleet Data

**Jim Vogelsinger, Director
Motor Vehicle Policy, OGP**

**Chouaib Touraq, Data Analytics Specialist
Office of Evidence & Analysis, OGP**

Background

- **Annual Reporting:** Agencies report motor vehicle fleet data annually under the [Subpart J](#) of the 41 CFR 102-34 Motor Vehicle Management regulation, utilizing the [Federal Automotive Statistical Tool \(FAST\)](#), cosponsored by GSA and the Department of Energy, collects Fleet data from **October 1 through December 15** for the previous fiscal year.
- **Public Data Summary:** GSA's Office of Asset and Transportation Management makes a summary of this data available to the public. This summary includes annual agency motor vehicle fleet inventory, cost, fuel consumption, and usage data, accessible via multiple GSA.gov sites.
 1. [Federal Fleet Report \(FFR\) Open Data Set:](#) A collection of spreadsheets summarizing inventory, fuel consumption, cost, and utilization of the motor vehicle fleet at the Federal and agency fleet levels. This data is available on the GSA.gov Vehicle Management Policy website.
 2. [Federal Fleet Report \(FFR\) Dashboard,](#) developed through GSA's Office of Evidence and Analysis, is a Tableau-based tool that is used for sorting, filtering, aggregating, analyzing, and visualizing the FFR Open Data Set. It caters to specific interests in the federal motor vehicle fleet and is accessible on GSA's D2D platform without requiring user login, including dashboards from FY14 onwards.

Federal Fleet Report (FFR)

Agencies annually report motor vehicle fleet data, as required under [Subpart J](#) of the 41 CFR 102-34 Motor Vehicle Management regulation, using the Federal Automotive Statistical Tool (FAST). FAST is a web-based reporting tool cosponsored by GSA and the Department of Energy.

A summary of this data which conveys annual agency motor vehicle fleet inventory, cost, fuel consumption, and use data is made available below. This promotes accountability and supports transparency across Government.

FFR Open Data Set

Spreadsheets of summary data of federal motor vehicle fleet inventory, cost, and use data as reported by Federal agencies.

FFR Dashboard

Data tool that allows users to aggregate, analyze, and display visualization data relevant to their interest in the federal motor vehicle fleet.

Questions and comments regarding the FFR can be directed to vehicle.policy@gsa.gov.

Introducing: Fleet Asset Level Data Tools

- Two Additional Tableau-based tools will be made available to government agencies and are hosted on GSA's D2D platform:
 1. [High Level Fleet Dashboard](#)
 2. [Fleet Executive View](#)
- Access will be automatically granted to users in the "GSA OGP MA Asset Level Data" user group.
- Users with accounts to access GSA's D2D platform that are not in this group will be granted access on request. The introduction of these dashboards aims to enhance data transparency and support agencies in optimizing fleet performance and resource utilization.

High Level Fleet Dashboard

Fleet Executive View

Navigating the D2D Portal and Dashboard

Getting Started:

1. Register with **MAX.GOV**: Use your federal (.gov) email to register. Visit the [D2D Portal MAX Login Page](#) and follow the [registration instructions](#):
 - a. For first time login, use VPN or a valid PIV/CAC card, and follow new login [instructions](#).
 - b. After the first time, enjoy simpler access with [one-click login](#)
2. Email us (vehicle.policy@gsa.gov) to request access to the ALD Dashboard Tools after logging into D2D

Need Additional Help:

- MAX Registration Issues: maxsupport@max.gov
- D2D Login/activation Issues: AskD2D@gsa.gov

Federal Fleet ALD Dashboard Summary

Asset Level Data Dashboard

- Offers **advanced** metrics for a detailed view of the fleet, including vehicle age and electric vehicle details
- Aids in **analyzing** costs associated with low-utilized vehicles and planning for zero emission vehicle deployment
- Supports **data decision-making** for optimizing agency fleets and strategic fleet management.

High Level Fleet Dashboard

Fleet Executive View

- Tailored for **leadership**, providing a quick, **clear overview** of fleet data
- Includes **filters** for detailed analysis, such as fiscal year, agency type, and vehicle location
- Features **timeline graphs** for Zero Emission Vehicles, inventory levels, miles traveled, and operating costs
- Designed for an **easy** understanding of key fleet metrics and trends

ABOUT THIS REPORT

Created by the Office of Government-wide Policy (OGP) to provide detailed insight into the Federal government fleet. This dashboard pulls data from the published Federal Fleet Report to create interactive visualizations, which allow users to slice and dice the data to their analysis needs. This dashboard can be used to analyze the government fleet and inform agency and government policies regarding vehicle purchasing and utilization.

Please click the GSA icon on this report page to open the visualization.

For data questions, please contact vehicle.policy@gsa.gov or gsafleet@gsa.gov.

Fleet Asset Level Data Dashboard

Navigate to <https://d2d.gsa.gov/report/asset-level-data-dashboard> to view the ALD Dashboard Tool

Fleet composition overview and detailed analytics of vehicles and usage

Tracks and analyzes agency and regional parks performance, vehicle types, usage patterns, and zero-emission vehicle adoption

Customizable filters for agency type, vehicle category, cost analysis, and more

Sourced from Federal Automotive Statistical Tool (FAST)

DEMO

What's Next?

- **Government-wide data availability is an ongoing priority.** We are excited to make these additional dashboards available to government users to promote data transparency and drive more informed benchmarking for agencies looking to evolve their fleets into the most optimal state for performance while saving resources.
- The OGP team will be following up with Fleet product users to provide additional demonstrations and discuss your feedback on the Asset Level Data Dashboard products.
- Your feedback can be implemented in the next release of the products!
- We plan to release an updated version with FY23 data by the end of March 2024.

and a member
of the North
Cascade National
Park "Fleet"

GSA Federal Fleet Manager Certification Program

- Users must register with a government email address.
 - Available to all GSA Fleet customers at no additional cost.
 - Self-paced, online, each module takes approximately 1 hour to complete.
 - Encompasses overarching federal vehicle policies and procedures.
 - Consists of six core courses and two electives (following the vehicle lifecycle).
1. Fleet Management 101: Your Roles and Responsibilities -- Upon completion, you should:
 - understand what fleet management is and how it supports federal agencies,
 - be familiar with the annual cycle for federal fleet planning, acquisitions, and disposals,
 - be able to identify the five key components in the fleet management life cycle and the fleet manager's role in each stage, and
 - know where to find additional resources and information.

GSA Federal Fleet Manager Certification Program

2. Vehicle Acquisition -- Upon completion, you should:
 - know vehicle-purchasing regulations,
 - understand how to plan vehicle acquisitions,
 - know how to purchase or order leased vehicles from GSA Fleet, and
 - understand what to do upon delivery.
3. Fleet Maintenance Management -- Upon completion, you should:
 - understand the importance of performing and tracking maintenance,
 - know ways to minimize maintenance and repair costs, and
 - know where to find resources to help manage the maintenance program.
4. Fleet Risk Management -- Upon completion, you should:
 - be able to define fleet risk management,
 - identify common risks and ways to manage them,
 - understand the importance of Emergency Risk Management Plans,
 - be familiar with risk management technology, and
 - understand accident management procedures.

GSA Federal Fleet Manager Certification Program

5. Liability While Driving a GOV -- Upon completion, you should:
 - understand driver responsibilities,
 - know the difference between official use and misuse of vehicles,
 - understand the impact of scope of employment,
 - be familiar with how the Federal Tort Claims Act impacts a driver found at fault for an accident,
 - understand the impact of using your privately owned vehicle for official government business, and
 - understand how the regulations apply when driving a rental car for official government business.
6. Disposal of Agency Owned Vehicles -- Upon completion, you should:
 - understand the regulations prescribing federal property disposal,
 - know the processes for disposing vehicles as excess, surplus, and exchange/sale property and how they differ,
 - be familiar with resources that can assist agencies with vehicle disposal to ensure all property is disposed of legally and in a timely manner.

NPMA Federal Fleet Certification Program

Three levels of Federal Fleet Certification are:

1. CFFS – Certified Federal Fleet Specialist (*first level*)

- Provides a basic level of knowledge for a fleet professional, such as a Vehicle Control Officer or Fleet POC, who supports fleet activities in an office setting.

2. CFFA – Certified Federal Fleet Administrator (*second level*)

- Provides an intermediate level of awareness and expertise for the fleet professional who manages or supports a Federal fleet and has successfully passed the CFFS certification.

3. CFFM – Certified Federal Fleet Manager (*third/final level*)

- Provides the fleet professional with advanced expertise and proficiency required of Fleet Managers who oversee an owned or combination leased/owned fleet. Successful completion of the CFFA certification is required.

Each level is completed in succession - CFFS>CFFA>CFFM

NPMA Federal Fleet Certification Program

- NPMA oversees program governance, test development, testing, and certification/recertification processes.
- TSI develops workshop content and provides trainers.
- NPMA charges for the program (higher cost for non-members).
- Classroom/face-to-face/two-day workshops (on-line being considered).
- Organization and site-specific workshops (with tailored content) available.
- Recertification required for retention of certification.
 - To be eligible for certification renewal, certificants must demonstrate completion of a specified number of qualifying criteria for their highest attained level in the 5-year period from their certification date:
 - Certified Federal Fleet Specialist – 2 qualifying criteria
 - Certified Federal Fleet Administrator – 3 qualifying criteria
 - Certified Federal Fleet Manager – 4 qualifying criteria
- Go to www.npma.org.

NAFA Certified Automotive Fleet Manager (CAFM)

- Has more than 2,000 fleet manager members from corporations, public safety (LE, fire departments), education (all levels), government agencies (federal, state, municipal, provincial), utilities, etc. (plus suppliers).
 - CAFM program recognized for partial reimbursement by the Department of Veterans Affairs.
 - Certification recognized by the Department of Labor.
- Open to any individual with at least one year of experience in any fleet-related position.
- Enrollment provides access for three years.
- NAFA charges for the program (higher for non-members).
- Eight modules comprise the self-study certification program:
 1. Asset Mgmt (from sourcing to remarketing)
 2. Business Mgmt (law, policies & procedures, RFPs, emergency operations, strategic partnering)
 3. Financial Mgmt (personal use, leasing, purchasing, reimbursement, budgeting, LCA, performance monitoring)

NAFA CAFM

4. Information Mgmt (FIMS, system selection & implementation, telematics, data mgmt & system admin, reporting & data analysis)
 5. Maintenance Mgmt (vehicles, shop, environmental issues, inventory mgmt., performance monitoring, outsourcing, shop staffing)
 6. Professional Development (mgmt of individuals, leadership, communications, organization processes, ethics)
 7. Risk Mgmt (fundamentals, insurance, safety policies & programs, crash mgmt.)
 8. Vehicle Fuel Mgmt (environmental issues, commercial programs, conventional and alternative fuels)
- **Fleet Discipline Certificate Program** allows you to take one discipline at a time (each priced the same).
 - **Sustainable Fleet Management Certificate** also offered (note: completion does not count towards CAFM requirements).
 - Go to www.nafa.org/certification.

APWA Public Fleet Mgmt Certificate

- APWA serves professionals in all aspects of public works in local, county, state/province, and federal agencies (plus private sector suppliers).
 - Worldwide membership of more than 31,500.
 - Stand-alone training events pop up; e.g., 1/11/24 is Enhancing Asset Management through Capital Operations & Funding (free to members).
 - Program consists of approximately 8-hour hour webinar workshop (Fleet & Equipment Mgmt, .7 CEU credits).
 - Covers organization structures, communication, procurement, purchasing, finance, and fleet operations.
 - Held over 2 weeks, 2 days each week, for 2 hours (recorded for later viewing).
 - After completing this course, you will be better able to:
 1. Describe the role of a fleet manager and determine the benefits of enhanced communication with partners and fleet customers.
 2. Recall basic finance and technology issues related to fleet management and identify global issues and their impact on fleet management.
 3. Explain common industry best practices.

AEMP Certification Program

- Serving those who manage and maintain heavy, off-road fleets.
- Offerings too extensive to cover fully here.
- Limit this presentation to the certification programs.
- Note that AEMP has an Equipment Management University which focuses on providing knowledge and expertise in four core content areas established around the various levels of experience found within the Equipment Management Profession.

AEMP Certification Program

- **EQUIPMENT MANAGEMENT SPECIALIST (EMS) Certificate**
 - A self-paced, fully virtual (on-line) course.
 - Materials and exams are available 24 hours a day, 7 days a week for one year (365 days) from a candidate's enrollment date.
 - Candidates will guide themselves through the material and activities under no set schedule.
 - Lessons may be completed in any order.
 - Estimated time required to complete the course curriculum is between 30-35 hours.
- **CERTIFIED EQUIPMENT MANAGER (CEM)**
 - Only recognized standard for judging the qualifications of managers of heavy off-road equipment and municipal and governmental fleets.
 - To sit for the CEM examination, you must have:
 - A minimum five years equipment management experience
 - An accumulation of 25 hours based on experience and continuing education

AEMP Certification Program

- **CERTIFIED EQUIPMENT SUPPORT PROFESSIONAL (CESP)**
- To sit for the CESP examination, you must have:
 - A minimum of five years of equipment supplier experience and
 - An accumulation of 25 hours based on your experience and continuing education.
- Your CEM/CESP designation is valid for five years.
- To avoid a lapse in your certification, you must complete 40 hours of continuing education during these five years.

Other Training Programs and Materials

- **DOE FEMP EV Champion Series Training**
 - Hosted by NREL (National Renewable Energy Laboratory)
 - www.energy.gov/femp/electric-vehicle-training
 - Four modules, self-paced
 - Attend all four webinars and earn up to 1.0 CEU and an EV Champion Training Certificate from FEMP
- **Other FEMP Training videos**
 - Get Your Sites “ZEV Ready”
 - Hydrogen Fuel Cells and Fuel Cell Electric Vehicles (FCEV): Emerging Applications and Safety Management

Technician Certification

- National Institute for Automotive Service Excellence (ASE) offers certification for automotive technicians.
 - Widely recognized standard in the automotive industry.
 - Covers a wide range of vehicle systems and components, including more and more electric and hybrid vehicle technology as the segment grows.
- Electric Vehicle Technology Training
 - Covers topics such as battery management systems, charging infrastructure, and vehicle control systems.
 - Essential for technicians to understand how to diagnose, repair, and maintain electric vehicles.
- Note: EV technology programs are still in their fledgling state across the U.S. and aren't yet standardized.
